REVIEW:

For the amount of room in this bag it is incredibly light. Having the added benefit of wearing as a backpack whilst trying to go through railway stations was a bonus although it can be quite heavy.

Pros:

- Lightweight
- Heaps of space
- End compartments excellent for shoes as its completely sperate
- easy to pull along
- soft so it stores easily

Cons:

- Doesn't stand up by itself, you have to lean it against something or lay it flat.
- Bag can be really heavy as a backpack when its fully packed
